New! From the University of California

This new manual for avocado growers and pest control professionals uses the most up-to-date research available from University of California faculty and Cooperative Extension specialists, farm advisors, and pest control advisors. Illustrated with 386 color photographs and 64 line drawings and charts that will help you identify and manage over 100 important pests and disorders.

Using this guide you’ll learn how to:

- Prevent and diagnose causes of damage
- Identify pests and key natural enemies
- Establish an IPM program for your grove
- Use biological control and other nonchemical methods
- Manage problems related to irrigation, nutrition, and the growing environment
- Determine when direct control actions are warranted
