

Plans this Nov-Mar

- Overwintering studies – now is the time
 - set out overwintering cages in fields
 - collect soil samples
 - quick check potential of overwintering fruit hosts
- Management guide for PNW
- Protocols for common activities to coordinate across research groups – degree day development, fruit assessment, etc.

Plans this Nov-Mar

- Increase colony production for lab studies
- Establish general egg laying pattern

- Olfactometer prelim testing
- Pesticide efficacy of registered products in the lab

Thinking longer term

- Field pesticide efficacy trials
- Biological control – local & foreign exploration

Grants submitted to PNW Small Fruits Center

- Delimiting infestations
- Fruit and odor preference
- Field scouting and monitoring
- Seasonal phenology
