

Need Help Solving a Pest Problem?

UC IPM Resources for Everyone

The University of California Statewide Integrated Pest Management Program (UC IPM) has online and in-print resources to help California residents and professional pest managers solve pest problems using less toxic methods and materials.

Web

Our website is packed with information on less toxic management practices for common pests in homes, gardens, and landscapes.

ipm.ucanr.edu

Features include:

- Information on how to manage pests using nonchemical and chemical methods
- Common pests and problems for over 250 plant species and their pests
- Photo galleries and identification tools for ants, vertebrate pests, weeds, turfgrass, and beneficial insects (“natural enemies”)
- A useful guide to keeping lawns healthy and pest free
- Understanding home and garden pesticides and how to use them safely

Tools

Plant Pest Diagnostic Tool

When you have a plant problem, this will help you diagnose the pest or environmental issue.

Seasonal Landscape IPM Checklist

A monthly guide to help landscape professionals and gardeners manage common pests of landscape plants.

Videos

Watch our short videos on common home and garden pests. Search YouTube for “UCIPM.”

Wildlife Pest Identification Tool

This visual guide to common vertebrates in urban areas pairs with our *Pest Notes* to help you identify and manage your vertebrate pests.

Connect

Read UC IPM’s blog, *Pests in the Urban Landscape* and the *Home & Garden Pest Newsletter* for the latest information about pests. Attend our monthly **Webinars** to learn from experts in community pest management.

Books and Card Sets for Everyone

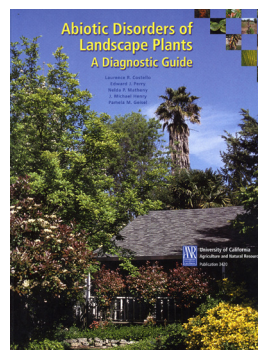

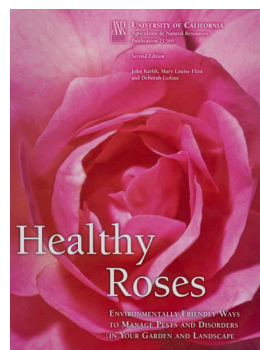

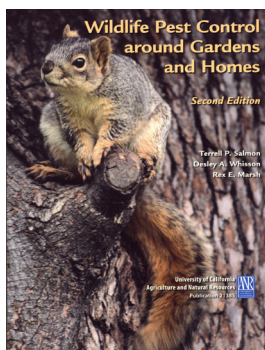

IPM Books for Pests Around Homes & Gardens

UC ANR's highly-acclaimed books include color photographs, plant-host diagnostic tables, and information on identification and management solutions for hundreds of pests and beneficials.

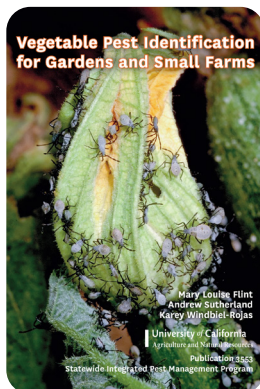

- ▶ *Pests of Landscape Trees and Shrubs*
- ▶ *Pests of the Garden and Small Farm*
- ▶ *Natural Enemies Handbook*

- ▶ *Wildlife Pest Control around Gardens and Homes*
- ▶ *Healthy Roses*
- ▶ *Abiotic Disorders of Landscape Plants*

Pest Identification Cards

The pest identification card sets are glossy, pocket-sized publications that feature photos of insect, disease, weeds, and vertebrate pests. Use these handy cards to help you identify pest and abiotic problems and choose appropriate less toxic management methods.

Order these and other printed publications from the UC ANR Catalog web site anrcatalog.ucanr.edu
